

SONU KUMAR

Full-Stack Web Developer

+91-9508449410 sonu9508kr@gmail.com linkedin.com/in/sonu-kumar-032b5130a github.com/sonudevolepar

Summary

Software Engineer specializing in the MERN stack with hands-on experience delivering 3+ comprehensive digital solutions. Adept at writing maintainable code and structuring databases to drive a 30% increase in engagement. Proven ability to bridge frontend interfaces with backend logic, improving overall system efficiencies by up to 40% for real-world applications.

Skills

Frontend Development: React.js, Redux, JavaScript, Tailwind CSS, Bootstrap, HTML5, CSS3

Backend & Database: Node.js, Express.js, RESTful APIs, SQL, MongoDB

Tools & Architecture: Git, GitHub, Terminal/CLI, API Integration, System Architecture

Experience

Web Developer Intern

June 2025 – July 2025

Internfy (Remote)

Tools Used: HTML, CSS, JavaScript, Bootstrap, Git

- **Developed** highly responsive user interfaces, translating 15+ complex wireframes into seamless pages.
- **Partnered** with a remote team to debug 30+ layout inconsistencies, boosting site accessibility by 25%.
- **Utilized** Git workflows across 5 modules, accelerating delivery milestones by 15%.

Projects

AI-Powered Library Management System | React, Node.js, Express, SQL/MongoDB

May 2026

- **Architected** a scalable ecosystem to streamline tracking for 1,000+ book records and manage authentication.
- **Built** robust routing logic, optimizing data transactions and reducing server response times by 40%.
- **Structured** efficient schemas, ensuring flawless data integrity for 500+ simulated active users.
- **Integrated** AI-driven endpoints to deploy a virtual assistant, cutting query resolution time by 30%.

Interactive Portfolio Website | React.js, Tailwind CSS

October 2025

- **Created** a high-performance personal portfolio, achieving a 98% Google Lighthouse performance score.
- **Drafted** comprehensive documentation and flowcharts, reducing onboarding time for code reviews by 20%.
- **Optimized** mobile responsiveness, guaranteeing a frictionless experience that increased session duration by 1.5 minutes.

Secure Authentication System | Node.js, Express, MongoDB

November 2025

- **Coded** a secure infrastructure featuring bcrypt hashing, managing 200+ concurrent logins with 0 latency.
- **Configured** middleware for role-based access control (RBAC), decreasing potential vulnerabilities by 99%.

Certifications

- **Intermediate Full-Stack MERN Development** – Udemy (2025): Mastered complex React frontends and Node.js backends across 5+ real-world modules.
- **React.js & Redux State Management** – Coursera (2025): Completed 40+ hours of advanced component lifecycles and centralized state management.
- **RESTful API Design & Node.js Architecture** – Udemy (2024): Built 10+ secure backend architectures incorporating advanced middleware.

Education

B.Tech in Computer Science and Engineering

Expected Graduation: 2028

Sandeep University

CGPA: 8.5/10 | Core: Problem Solving, Database Design, OOP
